1. Ink droplets can be placed with a pitch of 1/9600 inch at minimum.

2. Up to 300 Years' Life in a Photo Album when printed with ChromaLife100+ ink on selected Canon photo papers. Kept in a photo album, shut out light and air (gas), temperature 23 degrees and 50% humidity. Predicted value from the accelerated test. Result may vary based on individual environmental factors. For more information, please visit [canon.com.au/ChromaLife100+](http://canon.com.au/ChromaLife100+)

3. Document print speeds are the averages of ESAT in Office Category Test for the default simplex mode. ISO/IEC 24734, excluding time to print the first set. Photo print speed is based on the default setting using ISO/JIS-SCID N2 on Photo Paper Plus Glossy II and does not take into account data processing time on host computer. Print speed may vary depending on system configuration, interface, software, document complexity, print mode, page coverage, type of paper used etc.

4. Copy speeds are the average of FCOT and continuous copy speed, ISO/IEC 24735 Annex D. Copy speed may vary depending on document complexity, copy mode, page coverage, type of paper used etc. and does not take into account warming up time.

5. A computer that complies with Hi-speed USB standard and/or Wi-Fi is required

6. Pictbridge camera direct printing requires Pictbridge compatible camera in order to function. Check with your camera manufacturer or users guide to determine Pictbridge compatibility

\*Plain paper: Declared yield value in accordance with ISO/IEC 24711. Values obtained by continuous printing. 4"x6" photos: When printing Canon standard patterns continuously with the default settings of testing paper using Windows Vista printer driver in borderless printing mode and Windows Vista Home Premium Photo Gallery. Declared yield value determined based on Canon standard method referring to ISO/IEC 24711. The figure above is an average value, measured when printing continuously using the ink immediately after it is unsealed, until the ink is out. Ink yield may vary depending on photos/documents printed, applications software used, print mode and type of paper used. This should be used as a guide only and does not take into account ink that might be used for head cleaning or head refreshing to maintain printer performance.
