

Enabling users to shoot with EF and EF-S lenses (with and without Autofocus) when using the EOS M Compact EOS System

The mount adaptor offers the flexibility to shoot with the entire EF and EF-S range of lenses when using the EOS M body. AF is possible when using the Mount Adapter.

Whether it's macro, wide-angle, standard, telephoto or super telephoto lenses, your creativity is limitless with the new mount adapter.

50 Million Canon EOS cameras

Canon has a long and proud history of producing SLR cameras that both set the technology benchmark and evolve to satisfy the needs of all users from professional shooters to entry-level users. The EOS Series, which stands for "Electro Optical System" was first introduced in March 1987 as a new generation of AF SLR cameras and reached its 70-million-unit production milestone in October 2011.
