The newly developed and released EF 24-70mm f/4L IS USM lens is a light and compact standard zoom lens with high image quality and a full-fledged macro shooting mode.

The EF 24-70mm f/4L IS USM is the perfect companion to Canon's new EOS 6D which is a compact, lightweight full-frame camera.

Key Features

High Image Quality

- Equipped with 2 aspherical lens elements and 2 UD lens elements which allow the lens to achieve high resolution throughout the zoom range and image area
- Lens coating optimization achieves both a reduction in ghosting and optimal colour balance

High Functionality

- Setting the zoom ring to macro at the telephoto end allows for macro shooting
- Image Stabiliser delivers a level of sharpness equivalent to a shutter speed setting up to four stops faster. Equipped with a hybrid IS function which provides effect image stabilisation during macro shooting

High Durability & Reliability

- Dust-proof, drip-proof construction around the mount, switch panel, zoom ring, focusing ring and zoom ring lock lever allow the lens to be used in more harsh environments

Improved Usability

- Compact and lightweight design along with top quality leather-texture coating
- Equipped with a zoom ring lock which prevents the lens extending when being carried.

In October 2011, production for Canon's EF interchangeable lenses reached the 70 million unit mark. First introduced in March 1987, along with Canon's EOS DSLR camera system, the EF lens has over the years led the industry through the incorporation of a number of innovative technologies. The EF range, now including over 65 lenses, has evolved to satisfy the needs of all users from professional shooters to entry-level users.
